Home Health Care Services

Providing Care & Support
to patients in their own Homes

What is Home Health Care Service?

Home Health care is a service provided at the patient's home by A multidisciplinary team. It allows people with chronic health problems to live as independently as possible, in their own homes and communities.

Goals

- To support the patient to be more independent at home and dealing with the community.
- To provide accessible, flexible and timely services that respond to the needs patients.
- To enhance the patient's quality of life.

Who Can receive this Service?

- Patients who fulfil the eligibility criteria.
- Homebound patients who need health care, not those who need close 24 hour medical observation & care.

Criteria for Admission to Home Health Care Service

- The Patient does not require continuous 24 hour medical care.
- The Patient is homebound and unable to leave home.
- The patient Independently must have been seen by a PHCC Physician before Enrollment to the service.
- The needs of the patient can be met in the home environment

Services provided by the Home Health Care Team

- Physical assessment.
- Wound care / Dressing.
- Administration of Insulin or specific prescribed injections.
- Blood Pressure Measurement.
- Diabetic patients care and self-management
- Education of physiotherapy interventions to improve mobility.
- Blood Specimen Safe Collection.
- Patient and Family Health Education to prevent complications.
- Self-care training to enable the patient to live more independently.

Our Goals Are To Support & Manage Patients With Different Types Of Chronic Diseases.
